Arrival Delay Rate by Operating Carrier

Reported Delay Minutes by Category

FULL-YEAR 2025 FINDINGS

ATL accounted for 14.94% of network delayed arrivals.

LGA combined substantial delay volume with an above-average arrival delay rate.

Carrier and Late Aircraft represented 71.66% of reported delay minutes.

Airport and directional route patterns vary by location and season.

Carrier codes: DL Delta · OO SkyWest · 9E Endeavor · YX Republic. Comparisons reflect different routes, airports and schedules.
Reported delay minutes are attributed categories; they are not unique disrupted flights or financial impacts.

DELTA • FINANCIAL INTELLIGENCE

Consolidated Financial Performance | 2021–2025 | Financial Values in USD Billions

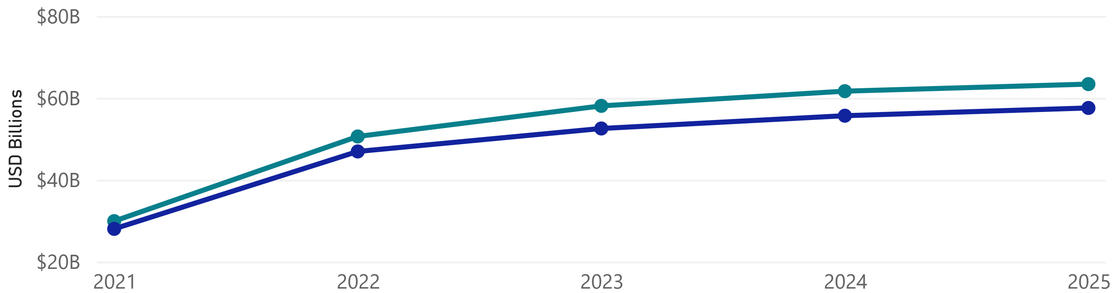

fiscal_year

2025

Operating Revenue (USD B)	Operating Income (USD B)	Operating Margin %	Operating Expenses (USD B)	Fuel Expenses (USD B)
$63.36B	$5.82B	9.19%	$57.54B	$9.82B

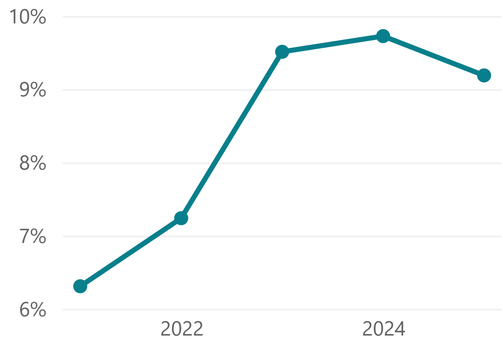

Operating Revenue vs Operating Expenses

2021–2025 • USD billions

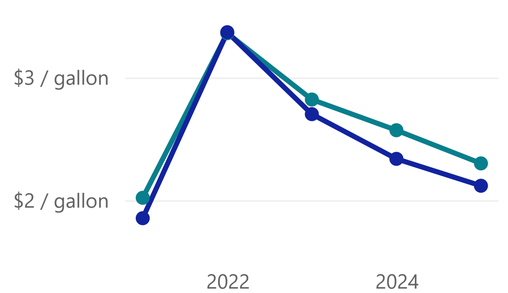

Operating Margin Trend

2025 margin −0.54 pp vs 2024

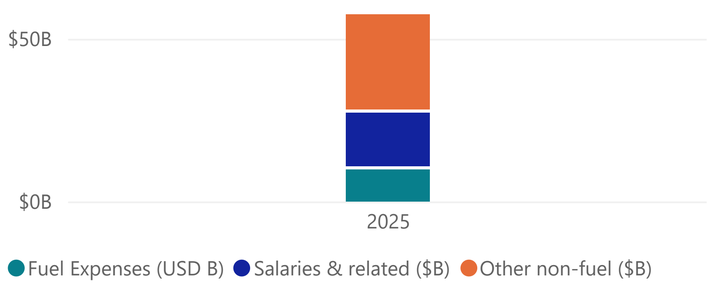

Delta Fuel Price vs EIA Benchmark

USD/gal • External EIA benchmark

Operating Expense Composition

Selected fiscal year • 2025 default • USD billions

WHAT CHANGED IN OPERATING COSTS? | 2024–2025

Fuel expenses	–$0.75B
Salaries and related costs	+$1.36B
Other non-fuel expenses	+$1.28B
Total operating expense rise	+$1.89B

Non-fuel growth more than offset fuel savings.

FINANCIAL EXECUTIVE FINDINGS | FY2025

01 Revenue +2.79%; operating expenses +3.40%.

02 Operating margin: 9.73% → 9.19%.

03 Fuel expenses –$0.75B; non-fuel expenses +$2.64B.

04 Salaries and related costs added $1.36B.

2025 VERIFIED KPI VALUES | Revenue $63.36B • Income $5.82B • Margin 9.19% • Operating expenses $57.54B • Fuel expenses $9.82B
FUEL CONSUMPTION | 2024: 4.11B gal → 2025: 4.27B gal (+3.77%); reported fuel expense fell 7.07%.
Delta Air Lines consolidated results, not allocated to domestic flights. EIA is an external market benchmark, not Delta's paid price.

1.63M	3	7	52	2021–25
2025 flight records	Dashboard pages	Reporting datasets	DAX measures	Financial reporting

HOW THE ANALYSIS WAS BUILT

01 PUBLIC DATA
BTS · SEC · EIA

02 PYTHON
Pandas cleaning

03 POSTGRESQL
SQL analysis

04 REPORTING
7 data tables

05 POWER BI
Model + DAX

06 DELIVERY
3 dashboards

WHY THE ORIGINAL PBIX IS PRIVATE

The original Power BI (.pbix) file retains an account-specific university SharePoint/OneDrive connection URL. To avoid exposing identifying connection metadata, that file is not publicly distributed.

These three dashboard pages are exported as a static PDF. Unlike the interactive report, this copy does not support slicers or direct DAX inspection.

WHAT THE REPOSITORY WILL INCLUDE

Python cleaning and validation scripts; PostgreSQL schema and SQL analysis; seven Power BI reporting datasets and a verified workbook; dashboard screenshots; data dictionary; methodology; KPI reconciliations; and Power BI technical documentation.

Public code repository: a clean, privacy-reviewed copy is being prepared. Its link will be added when published.

INTERPRETATION BOUNDARIES

2025 flight records cover Delta-marketed U.S. domestic operations; 2021–2025 financials are consolidated company results. EIA fuel prices are external benchmarks. Reported delay causes are source attribution, not established root causes.
